Appendix B

Text of Contract B

Technical Conditions for the Project
for Construction of a Testing Stand

The following technical conditions shall be met:

1. Basically the apparatus shall be modeled on the one built in Ainring by Professor Fischel.
2. The apparatus shall be based on the geometric ratio of 1:1,000 and a time ratio of 1:1.
3. The tolerances allowed shall not exceed 10 percent of the expected trajectory.
4. Simplification may be made with regard to the influence of the earth's gravity and the constancy of the missile's velocity.
5. The exact calculation of the actual trajectory and curves of the various position variants must be added to the apparatus.
6. The apparatus shall be equipped with a graph which registers the course of the trajectory.
7. The apparatus must be adapted to operate on 220 volt, or, as an alternate, on 110 volt A. C.
